

HOW TO RUN

NETWORKING PROGRAMS

networking programs requires Linux terminal for working

if you are on windows using wsl (windows subsystem for Linux)

is recommended

[Microsoft guide](#)

YouTube vid for installing-[youtube guide](#)

after type `sudo apt-get install gcc` in terminal for downloading gcc compiler

Step-1

Compile and run the server-side code first

```
measf@LAPTOP-83807D2I:/mnt/d/aiaiai/KTU-CSE/S6/CSL 332 NETWORKING LAB/TCP$ gcc server.c -o server
measf@LAPTOP-83807D2I:/mnt/d/aiaiai/KTU-CSE/S6/CSL 332 NETWORKING LAB/TCP$ ./server
Socket created successfully!
Binding successfull
Server is listening
|
```

Step-2

Compile and run the client-side code

```
measf@LAPTOP-83807D2I:/mnt/d/aiaiai/KTU-CSE/S6/CSL 332 NETWORKING LAB/TCP$ gcc client.c -o client
measf@LAPTOP-83807D2I:/mnt/d/aiaiai/KTU-CSE/S6/CSL 332 NETWORKING LAB/TCP$ ./client
Socket created successfully
Connection Successful
Client:
```

Send message from client to server and vice versa

```
measf@LAPTOP-83807D2I:/mnt/d/aiaiai/KTU-CSE/S6/CSL 332 NETWORKING LAB/TCP$ gcc server.c -o server
measf@LAPTOP-83807D2I:/mnt/d/aiaiai/KTU-CSE/S6/CSL 332 NETWORKING LAB/TCP$ ./server
Socket created successfully!
Binding successfull
Server is listening
Connection accepted from 127.0.0.1
Client: hello
Server:hi
```

```
measf@LAPTOP-83807D2I:/mnt/d/aiaiai/KTU-CSE/S6/CSL 332 NETWORKING LAB/TCP$ gcc client.c -o client
measf@LAPTOP-83807D2I:/mnt/d/aiaiai/KTU-CSE/S6/CSL 332 NETWORKING LAB/TCP$ ./client
Socket created successfully
Connection Successful
Client:hello
Server: hi
Client:|
```
